Adoption of Business Name

On January 1, 1998, the Saskatchewan Cancer Foundation adopted the business name **Saskatchewan Cancer Agency**. Saskatchewan Cancer Foundation remains the legal name.

Letter of Transmittal

The Honourable Pat Atkinson
Minister of Health
Province of Saskatchewan
Legislative Building
Regina, Saskatchewan
S4S 0B3

Dear Ms. Atkinson:

As Chairperson of the Saskatchewan Cancer Agency Board of Directors, I have the honour to submit herewith the report of the activities of the Saskatchewan Cancer Agency for the fiscal year ending March 31, 1999.

Respectfully submitted,

(Ms.) Pat Krueger
Chairperson

Mission

"Excellence in patient care and cancer control"

Vision

"An improved quality of life and health of people by minimizing the impact of cancer"

Values

- Respect • Equity • Excellence • Accountability • Compassion • Honesty

Organization - March 31, 1999

Board of Directors

Ms. Pat Krueger, North Battleford (Chairperson)

Dr. Borden Bachynski, Regina

Ms. Lena Dubray, Meadow Lake

Ms. Marion Heavin, Melfort

Dr. Craig Milne, Regina

Ms. Jean Perkins, Codette

Dr. David Popkin, Saskatoon

Mr. Gary Semenchuk, Regina

Mr. David Wild, Odessa

Ms. Kathy Zaitoff, Saskatoon

Mr. Robert Allen Chief Executive Officer

Dr. Mohamed Mohamed A/Executive Director,
Saskatoon Cancer Centre

Mr. John Knoch Associate Executive Director
Saskatoon Cancer Centre

Dr. Arthur Firth Executive Director,
Allon Blair Cancer Centre

Ms. Huguette Gauthier Associate Executive Director
Allon Blair Cancer Centre

Ms. Pam Smith Executive Director,
Epidemiology, Prevention & Screening

Ms. Dione Robson Associate Executive Director,
Epidemiology, Prevention & Screening

Mr. Lloyd Benson Director, Computer Services

Mr. Dennis Karakochuk Director, Human Resources

Ms. Valerie Lusk Director, Finance

Mandate

The mandate of the Saskatchewan Cancer Agency is to deliver a program which incorporates cancer prevention, treatment, research and education for the people of Saskatchewan.

The Agency's two cancer centres — The Allan Blair Cancer Centre in Regina and the Saskatoon Cancer Centre — provide treatment and follow-up services for Saskatchewan cancer patients and serve as centres for the co-ordination of a multi-disciplinary approach to cancer care. Clinic staff work closely with the patient's family physician, consulting physician and surgeon and other persons not directly employed by the Agency to ensure the provision of high quality care.

The Agency's Epidemiology, Prevention and Screening Division develops initiatives for minimizing the impact of cancer, enhancing wellness and reducing morbidity and mortality from cancer through increased understanding of cancer causes, prevention and control. The Screening Program for Breast Cancer is an important early detection component of this Division.

Nature and scope of treatment services

Only patients referred by physicians are treated in the cancer centres. The family physician and/or specialist is responsible for diagnosis. When the physician suspects the presence of cancer and has completed investigations, a diagnosis is arrived at and an evaluation made as to the extent of the disease and the treatment required. The patient is referred to the cancer centre or appropriate specialists and all cases of cancer must be registered with the cancer program.

When a malignant condition is discovered, the cancer centre medical staff, the patient's physician and consultant specialists plan a treatment program. If surgery forms part of the treatment, the patient and physician may choose an appropriate qualified surgeon from a surgical roster maintained by the Agency. If radiation therapy forms part of the treatment plan, it is administered by radiation oncologists at the cancer centres. Chemotherapy, the treatment of cancer through the administration of chemical agents, is administered by cancer centre medical staff and other physicians in consultation with cancer centre staff.

Follow-up after treatment

Regular follow-up examination of patients treated for cancer is a vital procedure in detecting recurrent disease and for assessing the effectiveness of treatments. The Saskatchewan Cancer Agency maintains follow-up activity with all patients receiving regularly scheduled examinations after treatment.

Support services

The staff of the cancer centre, in cooperation with the patient's family physician and consultant specialists, attempt during treatment and follow-up to prepare the patient both physically and psychologically for the future. Patients and their families often go through successive periods of stress and readjustment when faced with problems created by a diagnosis of cancer. Social workers at each cancer centre are available to meet the social and emotional needs of the patients and their families.

The 1998-99 fiscal year can best be characterized as one of continuous growth and adjustment for the Cancer Agency. Change has become a way of life within the health sector and the Agency is no exception.

A significant change for the organization was the announcement by Mr. Peter Peters, the Agency's Chief Executive Officer, that he would retire at the end of 1998. One of the main tasks for the Board was to recruit a replacement. A Selection Committee of the Board was established, selection criteria created, job description updated and, after an extensive search, the task was completed with the selection of Mr. Robert D. (Bob) Allen as the new Chief Executive Officer.

In addition, four Board members retired during the year — Ms. Susan Wagner, Mr. Al Goudie, Ms. Tina Dryhorub and Dr. Stuart Houston. New Board members — Ms. Marion Heavin, Melfort; Ms. Kathy Zaitsoff, Saskatoon; and Mr. Gary Semenchuk, Regina — were appointed to the Board.

With moderate funding increases, we were able to advance in the development of some programs to meet the needs of Saskatchewan cancer patients. We are grateful for the increased funding; however, the challenges facing the organization loom large on the horizon as we begin to see the impact of our aging population affected by the age-related disease of cancer. These demographics, fast-paced technological change and ever-increasing public expectations are elements that make the Board aware of its challenging role in ensuring that policy development, linkages with owners and partners, and obligations to monitor the Agency's outcomes are all being addressed.

Board Policy Development

- The Board developed explicit policies which form the basis for ensuring appropriate linkages with community stakeholders and health partners. With the adoption of the Board's Ends Statements, focus will shift to establishing

processes for monitoring to ensure we achieve our stated goals.

Linkages:

- Interaction with the provincial government continued in a number of ways, including a meeting with the newly-appointed Minister of Health, The Honourable Pat Atkinson, to brief her on various Agency activities.
- In February, 1999, the Agency, along with Judy Junor, Associate Minister of Health, announced the establishment of a high-dose rate brachytherapy program for prostate cancer patients. This provincial program, provided at the Allan Blair Cancer Centre in Regina, is the first of its kind in Canada. It will provide prostate cancer patients with the most advanced cancer treatment available at this time.
- The Board endorsed the establishment of the Canadian Association of Provincial Cancer Agencies, an organization with representation from cancer agencies across the country. This body will act as a point of collaboration and coordination for provincial cancer initiatives.

Monitoring:

- The Board was pleased to endorse the Agency acting as a pilot site for testing of the new Canadian Council of Health Services Accreditation (CCHSA) Achieving Improved Measurement (AIM) standards. The Agency will be surveyed early next year using these new standards and the AIM standards will ultimately be used by CCHSA in surveying all health organizations.
- On the recommendation of management, the Board approved the appointment of a number of new physicians to the Agency's medical staff, including:

At the Allan Blair Cancer Centre in Regina — Dr. Mohammad Salim, Medical Oncologist; Dr. Ismail Yaqoob, Medical Oncologist; Dr. Aamer Mahmud, Radiation

Report of the Chairperson

Oncologist; Dr. Frederik Vernimmen, Radiation Oncologist; and Dr. Patricia Tai, Radiation Oncologist

At the Saskatoon Cancer Centre — Dr. Nasir Shahab, Medical Oncologist; Dr. Robert Lowsky, Hematologist/ Medical Oncologist; Dr. Tien Le, Consultant in Gynecological Oncology.

The outgoing Board members, Susan Wagner, Al Goudie, Tina Dryhorub and Dr. Stuart Houston are recognized for their leadership in governing Saskatchewan's cancer program.

We thank Peter Peters, Chief Executive Officer since 1982, for his dedication and commitment to the task of improving cancer services for Saskatchewan residents.

We are pleased to welcome Bob Allen as Chief Executive Officer and are confident he will continue to provide the effective leadership of his predecessors.

In closing, I want to acknowledge the Board and staff of the Cancer Agency as a dedicated group of individuals committed to the task of reducing the burden of cancer for Saskatchewan residents. We thank them for their efforts this past year.

Pat Krueger
Chairperson

I am pleased to provide this summary of the Agency's activities for the 1998-99 fiscal year.

The Board has provided strong leadership in the development of the Mission, Vision, Values and Ends Policies for the Cancer Agency. These serve to provide staff with a focus for their dedication, commitment and energies in meeting our service, research, education and partnership goals.

Service:

- The Task Force on Cervical Cancer Screening continued to investigate the potential for establishing a screening program in Saskatchewan. The final results and recommendations of the Task Force will be presented in the new year.
- High dose rate brachytherapy treatment for prostate cancer patients was implemented in February 1999. This ultrasound-assist program is the first of its kind to be established in Canada.
- The community oncology program continued to expand. Fifteen Health Districts now participate in the provision of chemotherapy at their own facilities rather than in the Cancer Centres.
- Staff shortages in medical and radiation oncology and radiation therapy continue to challenge the organization in providing services to Saskatchewan residents. It is only through the extra effort and dedication of Agency staff that cancer patients continue to be served in a timely fashion. Fortunately, by implementing new recruitment initiatives, we have had some success in hiring Oncologists.
- Participation of eligible women in the Screening Program for Breast Cancer increased to 65%, one of the highest rates in Canada.

Research:

- The Agency provided funding for ten research projects valued at \$737,000. (See Research Projects, page 34)
- The Saskatoon Cancer Centre Research Unit attracted \$450,312 in competitive grant support from other agencies, including the Medical Research Council (MRC), National Cancer Institute of Canada (NCIC) and the Health Services Utilization Research Commission (HSURC).
- The Cancer Centre Clinical Trials research activity continued with participation in the National Cancer Institute of Canada, the North Central Cancer Treatment Group, the Radiation Therapy Oncology Group and the Childrens Cancer Group.
- Epidemiology staff participated on collaborative translational, interagency working groups for research into hereditary colorectal and breast cancer.

Education:

- The Agency visual display was set up at the SAHO Conference held in Saskatoon in March 1999.
- The 12th Annual Sylvia Fedoruk Prize in Medical Physics was awarded. (For additional information see page 40)
- The Agency provided financial support to the Third Community Cancer Conference held in Winnipeg in June.
- The 42nd Annual Cancer Symposium was held in Regina in November with the theme "Update on Lymphomas and Hodgkin's and non-Hodgkin's Disease".
- Agency staff gave a poster presentation entitled "Registry Linkages and Partnerships in Saskatchewan" at the North American Association of Central Cancer Registries (NAACCR) Conference. During the Conference, the NAACCR presented the Saskatchewan Cancer Agency Registry with a silver award for quality.

Partnerships:

- Partnerships with Health Districts, particularly with our host organizations — Regina Health District and Saskatoon District Health — are essential in assisting the Agency to fulfil its mandate. The Agency initiated a renewal of our formalized partnership agreements with these two districts.
- The continued expansion of the Community Oncology Program is a source of pride for Agency and Health District staff. This partnership allows our respective organizations to ensure that timely, accessible cancer services are provided to patients living in rural Saskatchewan.
- Our association with the University of Saskatchewan, College of Medicine, and the Canadian Cancer Society, Saskatchewan Division, ensures that continued collaboration exists in developing fundamental cancer research activities within Saskatchewan.

Planning for 1999 - 2000:

- Initiate the implementation of the Cervical Cancer Screening Program for Saskatchewan residents.
- Develop a plan for the timely upgrade of the facilities at the Saskatoon Cancer Centre.

- Implement a long-range capital plan, ensuring the timely replacement of critical treatment equipment, including linear accelerators, treatment planning systems and CT simulation.
- Finalize the feasibility of establishing multi-disciplinary breast assessment centres for Saskatchewan women.
- Ensure the Agency is prepared for the pilot survey of the Canadian Council on Health Services Accreditation to be held in the fall of 1999.
- Continue to expand the Community Oncology Program.

In closing, I extend a sincere thank you to the staff, volunteers, other health partners and individuals who have contributed to our success this past year. Your hard work and commitment to reducing the burden of cancer for Saskatchewan residents is greatly appreciated.

Bob Allen
Chief Executive Officer

Report of Management

Management is responsible for the integrity of the financial data reported by the Foundation. Fulfilling this responsibility requires the preparation and presentation of financial statements, in accordance with generally accepted accounting principles in Canada which are consistently applied, with any exceptions specifically described in the financial statements.

Management uses internal accounting controls, offers direction through Foundation-wide policies and procedures and exercises its best judgement in order that the statements reflect fairly the financial position, results of operations and changes in financial position.

In order to gather and control financial data, the Foundation has established accounting and reporting systems supported by internal controls. In establishing systems of internal control, management weighs the cost of such systems against the benefits that it believes can be obtained. Management believes that the existing internal controls provide reasonable assurance

that assets are safe-guarded and that the financial records are reliable for preparing financial statements and other data and maintaining accountability for assets.

The Provincial Auditor has examined the Saskatchewan Cancer Foundation's balance sheet as at March 31, 1999 and the statements of revenue and expenditure, fund balance and changes in financial position for the year then ended. Their responsibility is to express an opinion on the fairness of management's financial statements. The Auditor's Report outlines the scope of their audit and their opinion.

On behalf of Management.

Robert D. Allen
Chief Executive Officer

AUDITOR'S REPORT

To the Members of the Legislative Assembly of Saskatchewan

I have audited the statement of financial position of the Saskatchewan Cancer Foundation as at March 31, 1999 and the statements of operations and changes in fund balances, and changes in financial position for the year then ended. The Foundation's management is responsible for preparing these financial statements for Treasury Board's approval. My responsibility is to express an opinion on these financial statements based on my audit.

I conducted my audit in accordance with generally accepted auditing standards. Those standards require that I plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In my opinion, these financial statements present fairly, in all material respects, the financial position of the Foundation as at March 31, 1999 and the results of its operations and the changes in its financial position for the year then ended in accordance with generally accepted accounting principles.

W.K. Strelloff

Wayne Strelloff, CA
Provincial Auditor

Regina, Saskatchewan

**SASKATCHEWAN CANCER FOUNDATION
NOTES TO THE FINANCIAL STATEMENTS
March 31, 1999**

1. Legal Status of the Saskatchewan Cancer Foundation

The Foundation was created under provisions of *The Cancer Foundation Act* and commenced operations on August 1, 1979. The Foundation conducts a program for the treatment and prevention of cancer.

2. Significant Accounting Policies

These financial statements have been prepared in accordance with generally accepted accounting principles and include the following significant policies:

a) Fund accounting

The accounts of the Foundation are maintained in accordance with the principles of fund accounting. For financial reporting purposes, accounts with similar characteristics have been combined into the following major funding groups:

Unrestricted Funds

i) Operating Fund

The operating fund reflects the operations of the Allan Blair Cancer Centre, the Saskatoon Cancer Centre and their respective patient lodges. The Centres provide diagnostic services, treatment services in radiotherapy and chemotherapy, and follow-up services. The Centres also serve as the focal point for the co-ordination of a comprehensive and multi-disciplinary approach to all aspects of care and treatment for cancer patients.

ii) Epidemiology, Prevention & Screening

Research, education and preventive programs in this fund are aimed at minimizing the impact of cancer through increased understanding and awareness of cancer causes, prevention and control.

Epidemiologic research studies the distribution and determinants of disease in populations, and includes surveillance, monitoring, risk factor and outcome studies, as well as program monitoring.

The Screening Program for Breast Cancer has responsibility for screening mammography for women ages 50-69 years of age in the Province.

Restricted Funds

iii) Capital Fund

The capital fund reflects the equity of the Foundation in capital assets. The capital fund includes revenues received from the Department of Health - General Revenue Fund. Expenses are primarily amortization of capital assets.

Notes to the Financial Statements

iv) Research Fund

The Department of Health - General Revenue Fund has provided funding to enable the Foundation to support a number of research projects. The Department of Health has attached the following guidelines to the funds:

- a) Expenditure of these funds is at the discretion of the Foundation. The Foundation will assume responsibility for research costs in excess of the amount funded.
- b) Research funds, including investment income on the funds, should be kept separate from other funds of the Foundation.

v) Trust Fund

The Trust Fund accepts donations for contributions designated by the contributors to be used for such purposes as cancer research, equipment and library books. The Foundation maintains a record of the funds contributed and spent for each of the designated purposes until such funds are fully utilized.

b) Revenue

All revenue is recorded on the accrual basis of accounting.

c) Short-term investments

Short-term investments are valued at cost, which approximates market.

d) Capital Assets

Capital assets are recorded at cost. Normal maintenance and repairs are expensed as incurred. Capital assets are amortized on a straight-line basis over their estimated useful lives as follows:

| | |
|-----------------------|---------------|
| Buildings | 20 years |
| Leasehold Alterations | 10 - 20 years |
| Equipment | 5 - 10 years |

3. Capital Assets

| | 1999 | | 1998 | |
|-----------------------|----------------------|--------------------------|----------------------|----------------------|
| | Cost | Accumulated Amortization | Net Book Value | Net Book Value |
| Land & Improvements | \$ 280,297 | \$ — | \$ 280,297 | \$ 280,297 |
| Buildings | 18,236,378 | 10,483,379 | 7,752,999 | 8,659,894 |
| Leasehold Alterations | 10,028,181 | 1,882,838 | 8,145,343 | 8,566,425 |
| Equipment & Furniture | 19,677,975 | 13,634,994 | 6,042,981 | 5,702,123 |
| | <u>\$ 48,222,831</u> | <u>\$ 26,001,211</u> | <u>\$ 22,221,620</u> | <u>\$ 23,208,739</u> |

4. Net Change in Non-Cash Working Capital Balances Related to Operations

| | <u>1999</u> | <u>1998</u> |
|---|-------------------|-----------------------|
| Decrease (increase) in General Revenue Fund receivable | \$ 233,963 | \$ (212,628) |
| (Increase) decrease in other accounts receivable | (213,802) | 2,366 |
| (Increase) decrease in prepaid expenses | (75,826) | 26,262 |
| Increase (decrease) in trade accounts payable | 455,596 | (2,248,457) |
| Increase in vacation accrual | 60,692 | 21,269 |
| Increase in deferred revenue | 193,001 | 227,318 |
| Net change in non-cash working capital balances related to operations | <u>\$ 653,624</u> | <u>\$ (2,183,870)</u> |

5. Pension Plan

The Foundation participates in The Public Employees' Pension Plan, a defined contribution pension plan, for the benefit of its employees. The Foundation's financial obligation to the plan is limited to making regular payments to match the amount contributed by the employees for current services. The Foundation's pension expense for 1999 amounted to \$573,363 (1998 - \$512,163).

6. Commitments

The Foundation is committed under term leases for office space at the following minimum amounts over the next five years (exclusive of proportionate increases and additional occupancy costs):

| | |
|------|------------|
| 2000 | \$ 132,469 |
| 2001 | 96,011 |
| 2002 | 25,927 |
| 2003 | — |
| 2004 | — |

7. Cancer Patient Lodges

The Canadian Cancer Society, Saskatchewan Division, has donated two cancer patient lodges in the Province to the Foundation. Under the terms of an agreement with the Society, the Foundation has assumed responsibility for the operations of these lodges. Title to the properties will remain with the Foundation so long as they are operated as cancer patient lodges.

8. Related Party Transactions

Included in these financial statements are transactions with various Saskatchewan Crown corporations, departments, agencies, boards and commissions related to the Foundation by virtue of common control by the Government of Saskatchewan and non-Crown corporations and enterprises subject to joint control and significant influence by the Government of Saskatchewan (collectively referred to as "related parties").

Drugs and purchased hospital services acquired from related parties are recorded at exchange amounts agreed to by the related parties. These transactions and amounts outstanding at year end are as follows:

| | <u>1999</u> | <u>1998</u> |
|------------------|---------------|---------------|
| Expenses | \$ 10,467,257 | \$ 10,544,845 |
| Accounts payable | 1,600,051 | 1,583,057 |

Routine operating transactions with related parties are settled at prevailing market prices under normal trade terms. These transactions and amounts outstanding at year end are as follows:

| | <u>1999</u> | <u>1998</u> |
|------------------|--------------|--------------|
| Expenses | \$ 1,206,278 | \$ 2,472,129 |
| Accounts payable | 32,603 | 74,735 |

In addition, the Foundation pays Saskatchewan Education and Health Tax to the Saskatchewan Department of Finance on all its taxable purchases. Taxes paid are recorded as part of the cost of those purchases.

The Regina Clinic is leased from the Regina District Health Board for \$1 per year, including a portion of occupancy costs.

The Saskatoon Clinic building owned by the Foundation is situated on land not owned by the Foundation. The Foundation is not charged for the use of this land.

Other amounts and transactions with related parties and the terms of settlement are described separately in these financial statements and notes thereto.

9. Financial Instruments

a) Significant terms and conditions

There are no significant terms and conditions related to financial instruments classified as current assets or current liabilities that may affect the amount, timing and certainty of future cash flows.

b) The carrying value of the following financial instruments approximate fair value due to their immediate or short-term nature:

Cash and short-term investments

Accounts receivable

Accounts payable

10. Interfund Transfers

Interfund transfers consist of funds transferred from the Operating, Division of Epidemiology, Prevention and Screening, Research and Trust Funds to the Capital Fund to finance the purchase of capital assets and funds transferred from the Operating Fund to the Research Fund for research activities.

11. Budgets

Schedule 2 compares actual expenditures to Board approved budgeted expenditures for the year ended March 31, 1999.

12. Uncertainty due to the Year 2000 Issue

The Year 2000 Issue arises because many computerized systems use two digits rather than four to identify a year. Date-sensitive systems may recognize the year 2000 as 1900 or some other date, resulting in errors when information using year 2000 dates is processed. In addition, similar problems may arise in some systems which use certain dates in 1999 to represent something other than a date. The effects of the Year 2000 Issue may be experienced before, on, or after January 1, 2000, and, if not addressed, the impact on operations and financial reporting may range from minor errors to significant systems failure which could affect an entity's ability to conduct normal business operations. While the Foundation is addressing the Year 2000 Issue, it is not possible to be certain that all aspects of the Year 2000 Issue affecting the Foundation, including those related to the efforts of customers, suppliers, or other third parties, will be fully resolved.

The Foundation has been addressing the Year 2000 issue for some time in an effort to ensure that all aspects of the Year 2000 Issue will be addressed. A Year 2000 Plan is in place and contingency plans are being developed.

Schedule 1

SASKATCHEWAN CANCER FOUNDATION RESEARCH FUND
SCHEDULE OF RESEARCH GRANTS
Year Ended March 31

| | <u>1999</u> | <u>1998</u> |
|---|--------------------------|--------------------------|
| Participation in North Central Cancer Treatment Group | \$ 378,440 | \$ 312,347 |
| Participation in Children's Cancer Group | 175,084 | 158,783 |
| Research Director Fund, Saskatoon | 1,256 | 2,107 |
| Cell Surface Characteristics of Metastatic Cells in Human Tumors, Saskatoon | 56,833 | 37,823 |
| Novapharm Biotech, Saskatoon | (2,379) | 74,079 |
| Molecular basis of B72.3 Combining Sites and Synthesis, Saskatoon | 78,019 | 25,860 |

Funded by the Saskatchewan Cancer Agency Research Fund

Participation in the Clinical Trials of the North Central Cancer Treatment Group (NCCTG) and National Cancer Institute of Canada Clinical Trials (NCIC-CTG) *Tria Tirona, M., Walley, B., Keller, O.* in collaboration with other medical staff of the Saskatoon Cancer Centre and the Allan Blair Cancer Centre.

In 1998-99, 44 cancer treatment patients and 75 cancer control patients were accrued in the NCCTG study. Thirty-four patients were accrued in the NCIC study. These numbers significantly exceed the minimum requirements for maintaining active membership.

Participation in Children's Cancer Group (CCG) *Ali, S.K., Goh, T.S.*

At the Saskatoon Cancer Centre, 22 new patients were registered. Seventeen of these were entered in therapeutic studies. Twenty patients were not eligible for specific studies but were treated as per CCG protocols.

At the Allan Blair Cancer Centre in Regina, six new CCG studies were approved; 53 received annual reapproval and 13 addenda were approved. During the year 28 patients were registered with CCG. Fifteen were enrolled in five therapeutic and 17 non-therapeutic studies. Thirteen new patients were not on therapeutic studies.

Radiation Therapy Oncology Group (RTOG) *MacLennan, I.* During the year, eight new patients were entered into this study. There are 35 patients who have been treated and are returning for regular follow-up appointments at the Saskatoon Cancer Centre, as required by protocol.

Role of Sialyltransferase-1 in Tumor Metastasis *Carlsen, S.* This project focuses on delineating some of the unique features of tumor cells which allow them to metastasize. The SAT-1 GENE in LN4 cells have been cloned, sequenced and expressed. It is apparent that expression of SAT-1 activity turns off isogloboside production in these cells which supports previous biochemical

and cell-cell fusion studies. We are now at a position to determine if isogloboside plays a role in the metastatic process by modulating the expression of isogloboside in a single clonally derived cell line. In addition, we have cloned and sequenced the putative metastasis suppressor gene ms-1 which appears to be a transcriptional regulator. We have also identified a similar gene in human tumors. This opens up a whole new direction for our research program by allowing us to move into the human tumor system.

Molecular basis of B72.3 combining-sites and humanization of B72.3 antibody by resurfacing variable domains under the guidance of molecular modelling *Xiang, J.*

A computational model of B72.3 Fab/TAG72 complex was developed and, based on the analysis of this model, 17 complementarity-determining residues were found to directly contact to the TAG 72 epitope with hydrogen bonding. Further site-directed mutagenesis at the rest of 14 CDRs were conducted. All the mutations have been verified by dideoxy nucleotide sequencing. In order to confirm that these 14 CDRs are the contact residues, these mutated gene fragments were inserted into the plasmid vector to form various expression vectors, which will be transfected into tumor cells for further expression.

Development of a Model for Ovarian Cancer *Maksymiuk, A., Magliocco, T.*

The objective of the project is to investigate the value of serum CA125 level, tissue expression of CA 125 and CEA antigens in predicting relapse free survival and overall survival in patients diagnosed with primary ovarian carcinoma treated with the contemporary platinum-based regimen. The conclusion is that serum CA125 level measurement in patients with CA 125 positive cancer is a valuable tool in predicting both relapse free survival and overall survival in patients treated with contemporary platinum based agents. Detection of CEA overexpression in mucinous carcinoma makes it a possible

complementary tool in patients with cancers not expressing CA 125.

Clinical and laboratory aspects of this project are complete and an abstract and presentation related to the work made to the Royal College of Physicians and Surgeons meeting in Toronto in September 1998.

Identification of p85 SH2 Binding Proteins *Anderson, D.*

The goal of this project is to identify new proteins involved in the regulation of cell growth and cell survival by looking for new binding partners for the non-catalytic 85 kDa (p85) subunit of phosphatidylinositol 3'-kinase (P13 kinase). Two such proteins have been identified — the serine/threonine kinase A-Raf and the structural protein ankyrin 3, each of which can bind to the p85 protein. This has led to a further related study.

C-Src and Colon Cancer *Bonham, K.*

This project investigates the regulation of the human SRC gene which encodes the tyrosine kinase pp60c-src. Activation of this enzyme has been linked to many normal physiological processes but also to the development of several human cancer types, most notably colon cancer. Activation of SRC in a number of human colon cancer cell lines resulted from the transcriptional regulation of the gene itself. Previously the SRC gene had been isolated and a promoter region described. However, this promoter appeared to be involved in the constitutive expression of the SRC gene. Most recently, another promoter has been isolated, located just upstream of the original. In contrast, this promoter displayed a highly tissue-specific pattern of expression. Most importantly, this promoter is activated in colon and liver cancer cell lines and preliminary results suggest it is regulated by a transcription factor called HNF-1 which regulates gene expression in the liver, kidney and most interestingly, the intestine. Characterization of this promoter promises to unlock the secrets of SRC deregulation in cancer and also answer some fundamental questions concerning SRC function in normal tissue.

Genomic Instability in Non-Hodgkin's Lymphoma *A-Tweigeri, T., DeCoteau, J., Magliocco, T.*

This project aims to study archival, paraffin-embedded tissue from 80 cases of Non-Hodgkin's Lymphoma for the presence of genomic instability, using aneuploidy and MMR deficiency as markers of instability. Secondly, the cases will be evaluated for the presence of p53 abnormalities and frameshift ID mutations to determine whether or not "aneuploid" NHL shows differences from "MMR deficient" NHL. Results of the former will be correlated with the clinical information to determine whether or not aneuploidy, MMR deficiency, or p53 status predicts tumor behavior. In order to establish the presence of an abnormal MMR pathway in human NHL, several detailed investigations were applied to 40 cases of follicular lymphoma and 40 cases of diffuse large cell lymphoma. The findings implicate deficient MMR gene function in the pathogenesis of human NHL and indicate screening for hMSH2 and hMLH1 protein expression. ID mutations within the coding region mononucleotide repeats of BAX and TBR-II represent the most efficient method to identify cases that arise via this pathway.

Prostate Patient Immobilization Study *Cadman, P., Sidhu, N., Lapointe, C., MacLennan, I.*

This study is concerned with the measurement of random and systematic setup errors for patients being treated for prostate cancer. This data is essential for determining the appropriate treatment margins to include in radiation treatment fields when moving towards 3-dimensional planning techniques and escalation of dose for prostate patients. One of three arms of the study has been completed to date with findings to be reported when the project is complete.

Sylvia Fedoruk Prize in Medical Physics

Dr. Sylvia O. Fedoruk, a Medical Physicist with 35 years of dedicated and distinguished service to the Saskatchewan Cancer Program, retired in December, 1986. On the occasion of Dr. Fedoruk's retirement, the Board of the Cancer Agency announced the establishment of the Sylvia Fedoruk Prize in Medical Physics in her honour and in recognition of her contributions to cancer control.

This annual award is presented to the author selected as having published the best paper in Medical Physics in the preceding year, and must relate to work carried out within a Canadian institution. An anonymous selection committee, appointed jointly by the Canadian College of Physicists in Medicine and the Canadian Organization of Medical Physics, reviews the entries and recommends the successful candidates.

The award has been presented to:

| | | | |
|------|---|------|---|
| 1987 | ROBERT NISHIKAWA, GORDON MAWDSLEY, AARON FENSTER, MARTIN YAFFE, co-authors of the paper "Scanned-projection digital mammography", published in Medical Physics . | 1991 | QING-SAN XIANG, R. MARK HENKELMAN, co-authors of the paper "Motion artifact reduction with three-point ghost phase cancellation", published in Journal of Magnetic Resonance Imaging . |
